

SMARTEYE IVA

The easiest smarteye for you.

SmartEye IVA (Intelligent Video Analytics) is the easiest way to benefit of the services provided by SmartEye, by keeping the IP Camera system already installed. SmartEye IVA can be connected easily to more than one IP Cameras by using the standard RJ45 LAN connectors. By installing SmartEye IVA you can choose the right software package, within the family of SmartEye services, which perfectly fits your needs.

Thanks to its AI brain, SmartEye IVA performs the automatic on-board urban scene analysis just by analyzing the day&night video from the IP Cameras already installed. The module can be applied to outdoor lighting, urban mobility, social security and much more, both for public and private institutions.

Moreover, by monitoring crowded areas, SmartEye IVA can assure the highest level of protection against suspicious and dangerous events in public areas such as airports, train stations, ports and mall.

Plug & Play

Just connect via LAN to the IP Cams and follow the fast & easy configuration tool.

Multifunctional

Different services with just one installation. Customize the sensor configuration that better fits your needs.

Smart

The Artificial Intelligence algorithms analyze autonomously the area, without need of human supervision.

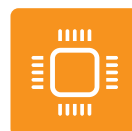

Safe

Information is directly processed on-board, encrypted and then distributed along the System. Privacy is thus granted.

Multi Camera

More than one IP Cams with a single module. Ask for a multi camera license to reduce costs.

Powerful Brain

The integrated high speed processor will assure fast and robust processing of the A.I. algorithms.
